

EU CODE OF CONDUCT ON

RESPONSIBLE FOOD BUSINESS AND MARKETING PRACTICES

TEMPLATE FOR COMPANIES

ROYAL DSM

REPORT SUBMITTED ON 29/04/2022

Type of business/sector	Sustainability dimension	Code aspirational objective	Individual commitments with baseline	Progress on KPIs and goals (qualitative and/or quantitative)				Comments
Consumer ingredients	Environmental	3 A climate neutral food chain in Europe by 2050.	Reach net-zero GHG emissions across our operations and value chains by 2050	Our intermediate targets for our net-zero-by-2050 commitment are our Science Based Targets (SBT). In 2021, we increase the ambition level of our SBT. Our SBT are an absolute reduction of GHG emissions from our operations (scope 1 + 2) by 50% (strengthened from 30% in 2021) and a value chain (scope 3) intensity reduction of 28%, both by 2030 versus our 2016 baseline.				Our scope 1 + 2 target is supported by our renewable electricity target (75% of purchased electricity to be sourced from renewables by 2030 and reaching 100% at the earliest possibility) and our annual average energy efficiency improvement of at least 1% until 2030. Our scope 3 target is supported by the CO2REDUCE program. The percentage of purchased electricity from renewable sources increased globally from 60% in 2020 to 72% in 2021, equaling a GHG emission reduction year-on-year in purchased non-renewable electricity of 52 kt CO2eq.
					Target level	2021	2020	
				Scope 1 + 2 absolute reduction targets	50%	27%	25%	
				Scope 3 intensity reduction target	28%	8%	5%	

				Our energy efficiency improvement (on primary energy) was 6.0% versus 2020, above our target of an average annual improvement of 1%. In 2021, the supplier engagement program CO2REDUCE continued to build on agreed roadmaps and progressed as planned.
